

# Rahul Vashisht

SOFTWARE ENGINEER | MASTERS STUDENT

## Employment History

### Full-Stack Engineer (Contract), Bluebeak.ai, Sydney

AUGUST 2020 — JANUARY 2021

Used ReactJS, NodeJS, and modern libraries to build an efficient, interactive, and informative AI platform.

### Software Engineer (UI), Lemnisk, Bangalore

JULY 2019 — NOVEMBER 2019

- Worked with the ReactJS Front-End team to develop the company's new Customer Data platform, which is used by the leading financial institution in India.
- Undertook code refactoring; Wrote HOCs, improved redux code practices, and rewrote existing ES5 code in ES6.
- Took part in weekly meetings with the CTO to discuss the impact of new product requirements and to discuss the best possible way to implement them

### Software Engineer, 1mg, Gurgaon

MAY 2018 — JULY 2019

- Worked on Chat Consultation business unit of 1mg (A digital health company). Added new features and fixed existing bugs. Used keyframes to improve the user experience.
- Wrote in pure JavaScript a plug-and-play widget that uses iframe to display chat consultation view, which was provided to third-party vendors in the form of Platform-as-a-service.
- Designed and built a new platform using React, Redux, and Ant design to be used by partner doctors. Also, made web-views for the mobile application of the same platform.
- Integrated new payment APIs using NodeJS proxy-server.

### Software Engineer, Jugnoo, Chandigarh

JUNE 2017 — APRIL 2018

- Revamped UI for a CRM project.
- Used AngularJS to add new features to internal web-panels for company's on-demand ride-sharing business. Used NodeJS to create API endpoints.
- Worked on the company's website. Wrote shopping cart logic, implemented google maps, made checkout page.
